

NEWSUG Meeting Minutes
November 14, 2006, 5:00 p.m.
Fox Valley Technical College, Appleton, Wisconsin

While this report generally covers the meeting events, those events have been arranged into a logical sequence and refined with the purpose of making them helpful rather than precisely representing the demonstrations as they happened.

26 people attended this meeting.

Announcements – Bob Braun

Our NEWSUG website has one more improvement to help you locate tips from a previously covered topic. A *Table of Contents* has been added to the Notes section.

SolidWorks World will be held on February 4 through 7, 2007 in New Orleans. A link to the meeting web site for additional details can be found on the NEWSUG web site.

We invite more members to join the Board. We can use extra help.

Library Features, Bob Braun – C³

Most Effective Assembly Practices – Jim Krivoshein, CATI

Click to open [Jim's](#) presentation.

Surfaces and Shells – Ed Eaton, DiMonte Group

For a presentation similar in subject to the one Ed provided us, please go to his website <http://www.dimontegroup.com/Tutorials.htm>, and under SolidWorks World 2005, you can download the 17.5 Mb presentation “Surfacing for Blockheads”.

Next Meeting:

The next meeting will be February 13, 2007 at FVTC.

The main presentation topic will be *What is New in SolidWorks 2007?* by SolidWorks representative Greg Jankowski. Greg has promised to focus his time on things that we routinely use (weldments, sketches, assemblies, drawings, basic shapes) and treat areas that we do not generally use (surfacing and shells, animation) lightly.

Tips and Tricks will be about *3D Sketching*.
